ZODIAC ARMORFLATE™ FILMED FOR DISCOVERY'S FUTURE WEAPONS PROGRAM THAT AIRS ON THE MILITARY CHANNEL

The Inflatable Armor System deploys in seconds to create a "force field" of protection against small arms fire for the crew, the craft and the engine

WASHINGTON, D.C. (December 4, 2007) – Zodiac of North America announced today that they have completed the filming of an episode of Discovery's Future Weapons program that airs on the Military Channel. The episode will focus on the revolutionary inflatable armor system, Zodiac ArmorFlate, and includes live fire sequences and animated explanations.

Constructed of Dyneema® UD and proprietary composite materials, the ArmorFlate NIJ Level 3A system protects against 7.62x39mm ballistic threats (e.g. NATO Ball, AK47, Dragunov and other similar caliber rifle fire). The unidirectional configuration of the fibers in Dyneema UD allows the energy transferred from the impact of a bullet or other threat to be distributed along the fibers much faster and more efficiently than in conventional woven fabrics.

By creating an inflatable structure to carry the ballistic material, the energy transfer is enhanced even more. In fact, during filming with Future Weapons, the ballistic materials is tested with several different solid structures to illustrate the difference in performance.

"We are very excited with the Future Weapons episode, because to have inflatable, bullet proof panels sounds impossible. With the technology available through the show, they were able to conduct real live fire tests, plus enhance the physical explanation of what is really happening with computer animation. The result is educational and fascinating to watch," Todd Salus, Director of Military Operations at Zodiac, commented.

Though Future Weapons has not yet announced an air date for the episode featuring ArmorFlate, updated schedules can be referenced by visiting <http://dsc.discovery.com/tv/future-weapons/future-weapons.html>.

Future Weapons, with host Richard "Mack" Machowicz (a 10-year veteran of the U.S. Navy SEALs), features new weapons and defense systems taking place in the world's arsenal to deal with the changing missions of 21st-century warfare. Viewers get an inside look at many of the breakthrough technologies designed to take on the challenges of terrorism, bomb threats, and close combat urban battlefields.

About Zodiac Of North America, Inc.

Zodiac of North America, Inc. is a subsidiary of Zodiac Marine and Pool, the inventor of inflatable boats, and global leader in the manufacture of RIBs, inflatable boats, life rafts and marine safety equipment. Zodiac of North America, Inc. corporate headquarters are located at 540 Thompson Creek Road, Stevensville, MD 21666; Phone: (410) 643-4141; Fax: (410) 643-4491; Internet: www.zodiacmilpro.com and www.zodiacacademy.com
